Single USB Connection For Easy Data Transfer

With USB DirectLink, EXP has taken the latest USB (Universal Serial Bus) technology and applied it to mobile computing in order to give you a simple solution for sharing data. USB DirectLink is a powerful cable specifically designed for desktop, notebook and handheld computers that allows you to transfer files between two PCs. The cable interface is embedded with an ASIC chipset that eliminates the need for additional hardware, making installation and mobility virtually effortless. In a matter of minutes you are ready to share import files between your desktop and notebook that you need while at home, at the office or from the road!
